

New LE Food Service Module

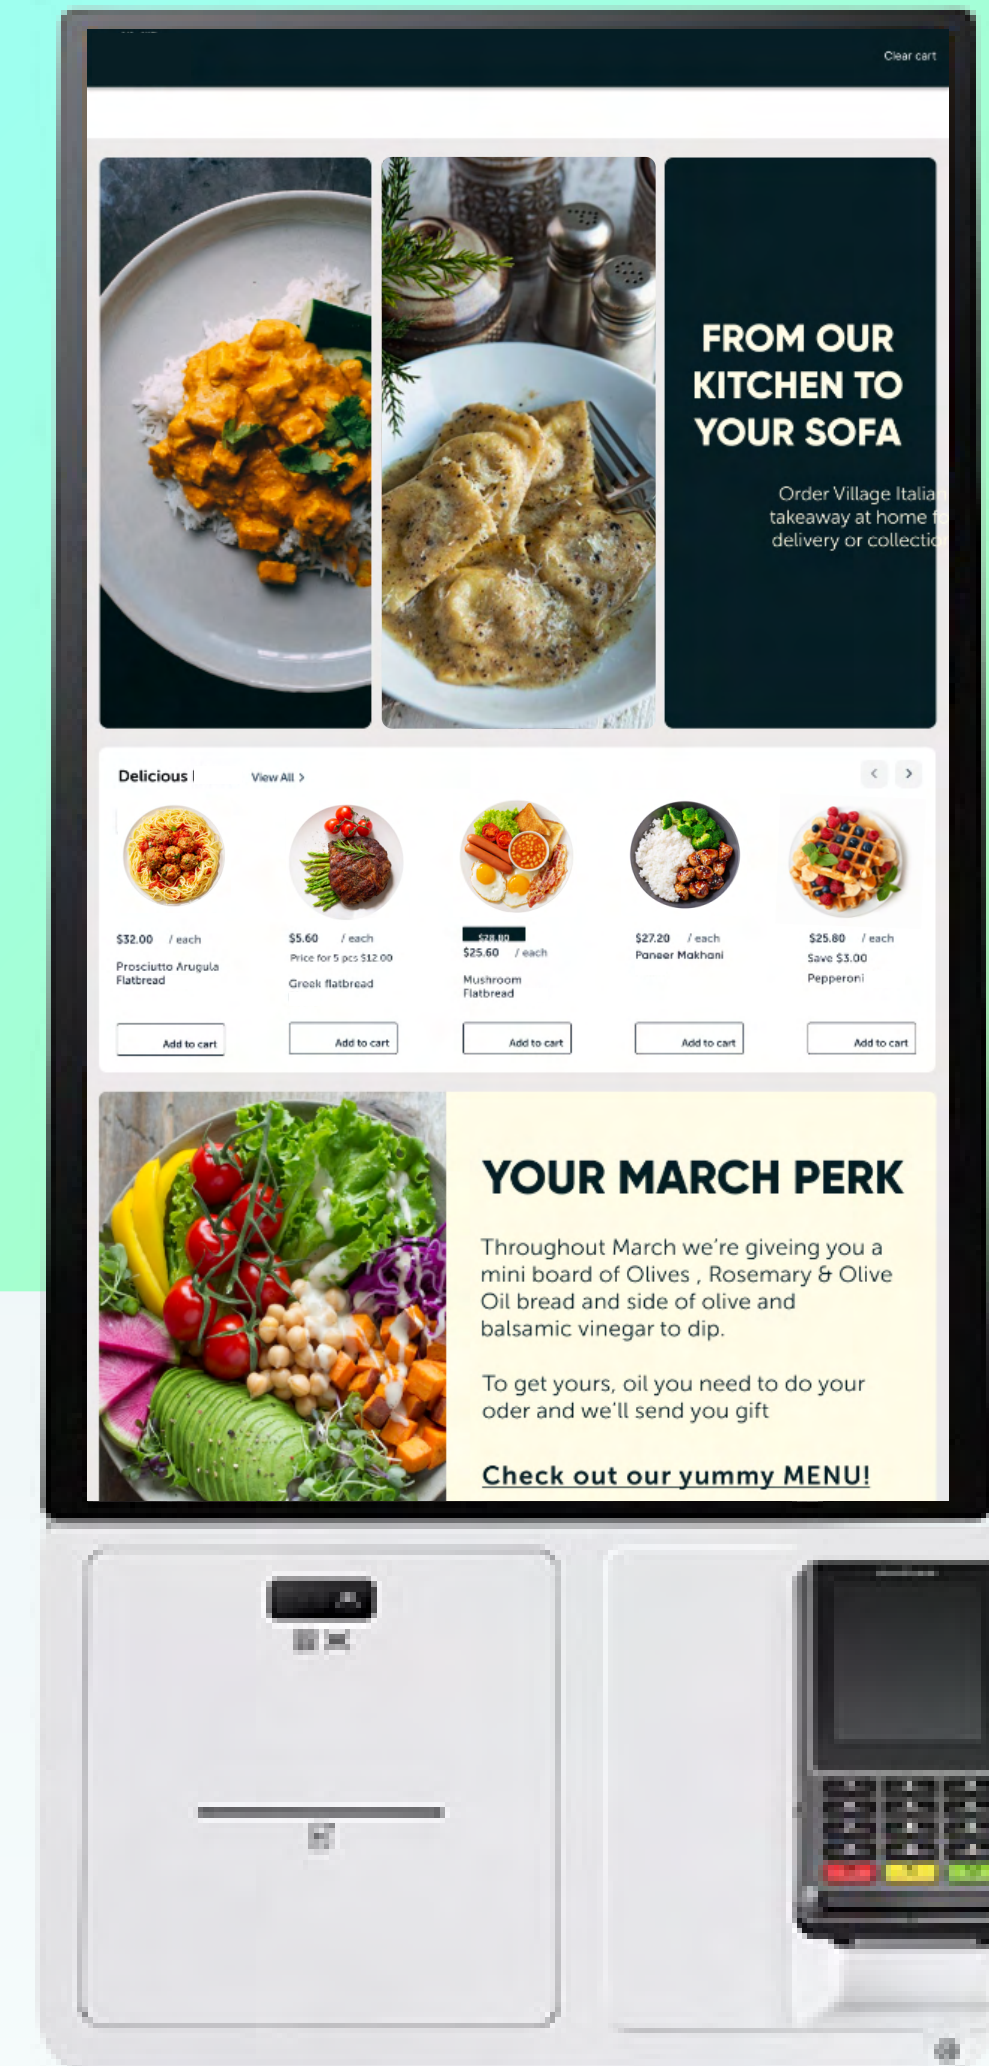

for Foodservice Category & Catering

Local Express revolutionizes food retail with advanced tech for increased profits. Our solutions deliver exceptional **ROI** and resounding success!

Local Express Foodservice Module is the perfect omnichannel eCommerce for **QSR, hybrid delis, grocery, caterers, and supermarket foodservice departments.**

With this **module**, foodservices and catering departments can utilize all of its digital assets – website, native mobile app, and in-store ordering kiosk and integration with their POS system to take customers' prepared food experience to the next level.

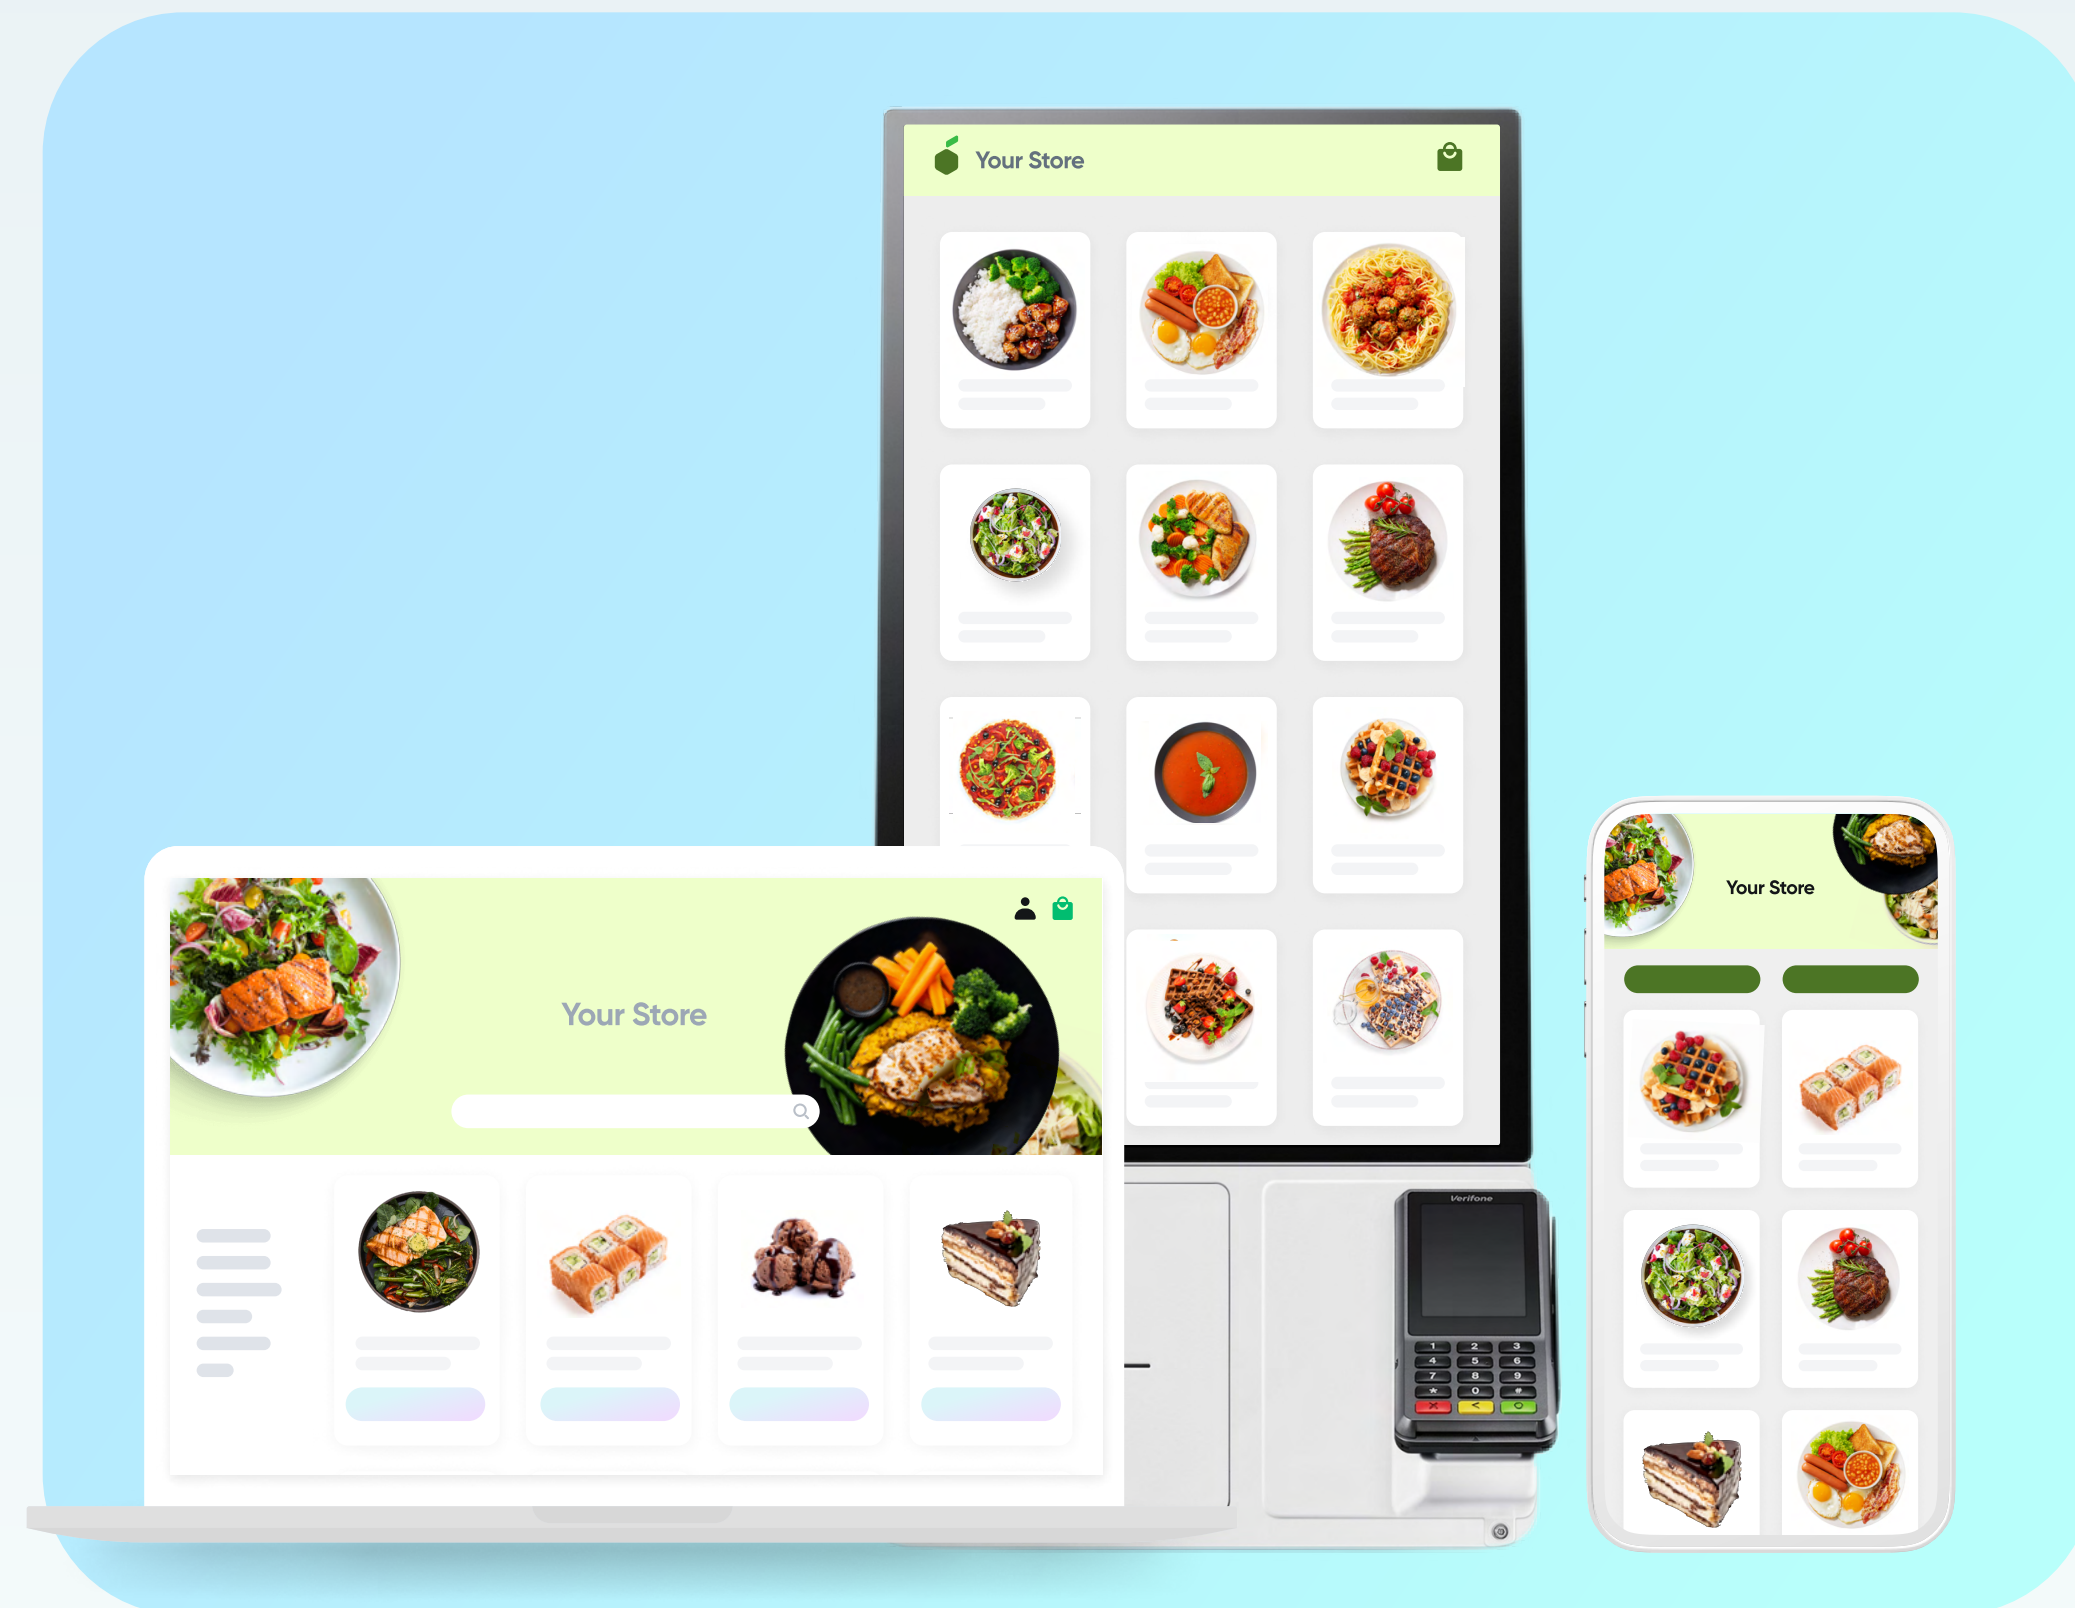

Our kiosk software is set up in days not months

The Local Express Foodservice Module offers a unique look & feel and branding for all sizes of quick-serve, prepared meals & catering services.

It allows stores to completely customize their own menu with selectable options in real-time with a simple drag-n-drop interface.

The customers will have full control over ordering and be provided with upgrade opportunities, substitutions, and add-ons, automatically personalized to each customer's preferences.

With just **a single dashboard for food and grocery** operations and seamless POS integration, the Local Express Food Module **improves efficiency** by coordinating **orders directly** to the preparer or the kitchen.

Moreover, the system provides **custom prep time** by category and ticketing by **multi-departments** to ensure that the order is ready when the customer arrives.

USE KIOSK AS DIGITAL SIGNAGE WHEN NOT IN USE
